## SUMMARY

I have a background in marketing management and a keen interest in programming, specifically in web and mobile app development. I am highly motivated to transition into a new career path in the tech industry. Recently, I completed Hacktiv8 bootcamp as a Full-stack Javascript.

## EDUCATION

**Hacktiv8**                                                                                          **Jakarta, Indonesia**
*Full Stack JavaScript Immersive Program ([Transcript](#))*                    *October 2023 - January 2024*

**Paramadina University**                                                                       **Jakarta, Indonesia**
*Bachelor of Management (GPA 3.65/4.00)*                                                        *2016 – 2020*

## WORK EXPERIENCE

**PT Think Media Indonesia**                                                                   **Jakarta, Indonesia**
*Business Development Executive*                                                  *October 2022 – January 2023*

- I conducted market research to identify new business opportunities and potential clients for collaboration.
- Was proactive by conducting cold calling, presentations, emailing, and persuasively presenting the products and services to prospective clients.
- They visited prospective clients directly to understand their needs better and established strong relationships with them.
- Provided consultations that focused on an in-depth understanding of each client's needs, provided relevant solutions, and provided the necessary information.
- Identified client needs and prepared competitive price offers while ensuring that the price offers reflected value commensurate with the products and services offered.

## SKILLS

**Language:** JavaScript, Typescript
**Front End:** HTML & CSS, Tailwind CSS, Bootstrap, React Native, React.js, Next.js, Apollo Client, Expo
**Back End:** Node.js, Express.js, PostgreSQL, Sequelize, MongoDB, Apollo Server, Rest API, GraphQL, Redis

## PROJECTS

**MovieTime** | [Github](#)                                                                        *January 2024*
MovieMate is a mobile application designed to make it easier for users to book movie tickets online. This application provides complete features ranging from movie search, to ticket payment safely and quickly.
*Tech Stack: React Native, Expo, Node.js*

**BloodBuddy** | [Github](#)                                                                       *January 2024*
This app connects blood donors with nearby centers/hospitals to speed up the blood donation process.
*Tech Stack: NestJs, React Native, MongoDB, Expo, Node.js*

**Ethereal Stores** | [Github](#)                                                                  *January 2024*
